

Lesson 12 Charts

William made a chart to show the annual sales of his company. The chart made it easy for his staff to read and compare the sales. Learning how to read charts can help you solve many types of problems on the TABE.

Example The chart below show the annual sales of William's popcorn company. What were his company's sales in 1990?

Yearly Sales

Year	Sales
1985	 ← \$137,000 → 
1990	 ← \$140,000 → 
1995	 ← \$129,000 → 
2000	 ← \$1,000,000 → 

Step 1. Read the question carefully to make sure you understand what information you are looking for. In this example you are looking for the *sales* in *1990*.

Step 2. Find the information that answers the question. Use the correct column and row. Look in the column labeled *Year*. Find 1990. Look at the sales number to the right of 1990.

The sales of this company in 1990 were \$140,000.
